Mr Crowley supprised the lawyers and speciators by a nouncing that he would here rest his case. He then summed up for the defense saying this was the most remove. spectators of the them summed up for the defense saying this was the ment remark able trial be had ever witnessed. After the courtroom had been flooded with trinks and packages, and witnesses had been sworn as to what they contained the government had seen hi to rest its case without opening one of the trinks and not one of the pury could say what the contents were. Only two small cans had been opened those which a chemist had at alyzed and it was not proved that they contained opinim. Who could say defendant had smuggled opinin? He urged the jury not to draw any inferences a, and defendent because he had not put him on the stand in his own behalf. I very prisoner stands with the great shield of pre umplion of innocence above him until he is proved guity. We rest our cive upon the absence of legal or dence on the part of the bovern

of legal ev denor on the part of the government. United States Attorney Lockwood summed up for the government. The address of the opposing counsel, he said had not said a word about evidence but had simply arraigned the government for not introducing more evidence. The court had found enough evidence in the case to send it to the jury on the question of fact. He character need the defendant as a man who e every step since the government got on his track had been or nucted with crims. He then reviewed the testimony of the principal wit nesses for the government and urged that the perpetrators of such crimes should not go unpunished.

First Grant and Ben Butterworth

Fred Grant and Ben Butterworth

Lide Nov 28—Every day now
witnesses the agricult of a fresh batch of distinguished statesmen and politicians,
making their pilgrimage to the
big britk lenceless house of Deiaware averue Among the presidentelect svistors this formoon were Senator C
B Furwell and ken Martin, chairman of the
litinos republican central committee. They
came from Chicago on the early train and
were accompanied by Loi. Fred Grant. The
party made a very histy trip dirty ng out to
tien Harmon's immediately after breakfast remaining with him about an hour
and a half and on returning they
went direct to the depot embarking for Chicago at 11 35. They moved with such alaonty that the newspaper correspondents had
to throw out jicket juards, so to speak to
capture them only to find them as dumb as
of yers on all cabinet thenes or presidential
policies.

o) ser's on all cabinet themes or presidential policies.

Senator Farwell in telling his impression of first Harrison remarked that he had a big head and a close mouth. The evening train from Cincinnati brought two distinguished pilgrins from Ohio in the persons of Hon M. Hana of Chevland and to ingressman Ben Butterworth of Clincinnati They held a conference with the president elect at 7.90 this evening remaining in consultation a couple of hours. The well known inflinite relations of both gentlemen especially of Mark Hana with benator John Sherman, contributes much interest to their visit, and kends color to a theory that the president-elect is making somathing of a study of the intrincises of Ohio poluca, but to what purpose can only be conjectured.

Gu, Harrison up to date has had a mountain named for him two big gas wells, a new variety of apples and forty-four hables.

He had already written Bassett Doan and Matthias I first that their sons were wound to and the tanker and farmer received those tubing they at once resolved to go to the bedshiet of their boys. While preparations for the trip were being made harmer Dean chanced to see Banker Hart on his way to a public livery for the purpose, he well knew of hir ing a trap for the trip of a hundred unless swallowing a great biglump of pride armer Dean approached Banker Hart, and in his bliff way blurded out.

"Look here, Matchias, I tilkick we've under the under the total man we'th Think do to the total man we'th Think their man we'th Think their man we'th Think their with the first in the total man we'th Think their sons and set of the trip of the trip with the trip with

A Democratic Wall Minns. We have often said that Mr Cloveland forced his own renomination. The wretched reflection is that in the whole convention of notable democrats at at I outs there was not one man to sound the alarm or to resent the coercion. But the thing is all over now. It remains for democrats to accept the situation and to contemplate for a moment the kind of afth tion that is presented. A complete republican rule with both house in accord with the president an early id air stone of the time of the publican stress with two senators cach and a nun ber of new tembers of congress, in all at the very least a republic A Democratic Wall congress in all at the very least a republican addition thereby to not only the senate and house that to the electoral college of twenty or nore veter with which to meet the solid Bo (the effect dv broken) and for included and New Jersey in 18). ### BI LIBVING AND ACTING

Gen Harrison in answering a letter from the eultor of the Greenville (S. C.) Dady Acus while refusing to make any specific answer to questions as to be future policy expresses surprise that they snould hean party as wholesome to the whole country and adds with striking pertinence i those who in their hearts believe with us on these questions would not with us other questions that give you local concern Here we have in a nuishell what should

prove a solution to this yexed Southern problem. Harrison has wonderful tact in expression and if he can carry out a policy of will break the solidity of So (there sentiment and create a feeling that will shatter preju-dice and quify the nauonal stuation. There are many men of intelligence at the South who differed from democracy on the princiact out their sentiments. They were chained by the hitter prejudice of their section to the name democracy, and either did not vote at all or voted for a party whose principles they did not date to diserow It is beyond belief that the men who re

The prohibitionists of New York polled temperance element stands for the extreme of problibition knowing that it is impossible to accomplish it as society is now constituted invites comparisons as well as argument. The problibitionists of New York polled 30 692 votes, of which four fliths were taken In 1884 this republican defection elected Cleveland In spite of the strong fight against Warner Miller by the liquor interests and the fact that all the strength of the liquor interests was striving to defeat the republican candidate for governor, 27,774 prohibitionists voted for their own man and let

These men beheve they are fighting a good fight in a good cause. They could easily have defeated the liquor candidate for each Hill most openly was, but they demanded prohibition or nothing—and they got noth ing Here was a battle-lost to temperance because the prohibition reserve would not come to the rescue Let us suppose a parallel war, for example Let us suppose there was on organized army of 80 000 men standing looking on while a densive battle was being fought on which the fate of the Union and the nation depended. This 30 000 are simon pure abolitions to they want the Onion pre served and slavery abolished but they re fuse to fight under Grant or Sherman because they are not fighting to abolish slavery They will not recogn so that a man is really trying to save the Union unless he wants to abolish slavery first. So they deploy off on the flank and cinnonade all the woods in that direction where they do no gool and allow the Un on army to be beaten and the

The cases are parallel and the comparisons just. The republican party has within its lines the majority of the best men of the na-tion and the great body of the temperance men at the North are republicans 1 et their character and that of the party goes for naught with these party prohibitionists who shout 'That or nothing' But they always get nothing if there was an instance like the hypothetical battle field alluded to above how would the defeated army feel toward the reverve that permitted its defert upon a shallow pretense? How would the ultra sentiment it favored be re-Answer these questions and you will show how the prohibition cause stands with the country to day Temperance men by thousands feel that prohibition is a de-signing aliy of of sectional free trade and an enemy to be fought rather than a cause

Those who are ignorant of the distinction between the Prigrim fathers who settled the Plymouth colony and the Pu stans who later settled Boston naturally are perplexed by the fact that Thunksgiving, a day of first and family reunion, should have spring in and flourished among a people in tere to the point of a continue. The truth is that point of a centilism. The truth is that liminkersiving, as a day of seasons and good cheer, begun with the Pilgrims of the Plymouth colony, who were not the Purtans subrized by the comic dramatists of the restoration Goodwin in his scholarly history of the Pilgrim Republic, shows conclusively that the Pigrans were not sour feed snuffing, bigoted, nerrow zedots They were tolerant for k not persecutors of other faiths than their own and during the witch mania the pulgrim colony of Plymouth kept itself entirely free from the stain of innocent of the Boston or Puritan colony Williams after his exile continu d on the friendliest terms with Bradford Winstow and Standish. The spirit of the Pilgrims was and he who forgets this fact will fail to comprehend rightly the growth of New England The traditional sour cold hard austere Yankee was a vulgar Puntan while the ford is full of the spirit of good fellowship He describes the first Thanksgiving day as a day of frolic. The Indians brought game for the white men's feast the young men drank rum at intervals, shot at a nurk wreatled, atc. Indeed the first Thanksgivin

This explains that singular morel and spiritual evolution of New England thought and character that is illustrated by seem unaccountable inconsistenties rather irreconcilabilities. How strange New England stock should have been con spicuously hostile in thought and action!

The explanation lies in the fact that the fathers ashes glow anew in the calldren's fires. The Pignin strain of sweetness and freedom and light which stond for Carver Winslow and Brad ford became a bright consummate flower in Emerson Parker and Philips and the Puri tan ascaticism pessitaism narrowness po-hticil and religious intolerance of the Endi colt and Mather type of Puritans reproduced itself in the Boston doughlace democracy and the Jonathan Edwards chool of theolog test metaphysics. If any body believes the old co omal New Engiand in its first youth was instinct with austerity that degenerated into sickly ascell-cism in social life, we commend him to read cash in social rite, we commend that to read 'How Judge Sewall Courted Madame Win-throp' Judge bewill lived in the days of the Salem witchcraft. In his diary, which is as delightful as that of Pepys' the fine old gossip of Charles the Second's time he re-lates that he began hi courling by glying his mistress a religious book but he confesses that he did not place his sole rehance on that he did not place his sole retiance on spiritual influences for he says. I gave Sarah Chickering the Maid 2s. June who brought in wood, is Afterward the Nurse came in I gave her 18d having no other small Bill. The judge on his second visit, did not present Madaine Winthrop with a contract he saws. I says her a place of tract for he says I gave her a piece of Mr Beicher's Cake and Ginger bread,

The Walla Walla Statesman s wall available cars of the O E & N to are in use and there is wheth cough in the upper country to keep the road in full operation and all its rolling stock in use until the pext harve the country. If this should at a little exagger that the site remains that the upper country, has resurrees in he developed that country' has resources to be developed that will be so far above all the present produc-tion of the Inland Empire that some more reliable mode of transportation than existing nit roads furnish must be provided fin portant questions come up for answer. One related to the possible panduction of the future, end on their to the che-pest and most reliable mode of transportation for car. rying grain to market, so that the producer can afford to produce it

Licut Frank Greene of the signal service reports to the scarctary of war that Wash ington has 5 000,000 acres of wheat land, and Oregon has 5 600 000, all of which is clear land fit for cultivision. Here there are 10 000 000 acres or more that should average missing the control of the twenty bushels a year, and if only half of it could be annually harvested, that would give a bundred mulion bushels of wheat au nually to be produced from the Pasisia Northwest Add the lands in Northern Iduho that are all waturally irlbutary to the Columbia river, and they will still increase the ratio of production. This estimate will answer a purpose by showing what the capacity for production is in our region. It is not unreasonable to claim that this North Pucific region has immense capacity for wheat growing and with wheat at present neures it will soon be criled into life by active immigration and settlement

One fact to be recognized is that all this region or the most of it, is naturally tribu that to our rivers and the rivers of this whole region are tributary to Portland Water transport is always cheaper than by rail and it is therefore for the interest of the people of Oregon that river transport shall be read accepted. se made possible. If the river trade is made available then Portland will receive all the

advantage she can desire from that source.

I make the rivers available, obstructions must be removed. Fortisand is us much in terested as the productive the medical in make ing the canal and locks at the Curcudes and the ship railway or canal at The Dailes Portland is interested in seeing barges made with grain coine to her wharves from all the interior With the occan entrance improved as it can be and should be and the Communication river made easily navigable for all shipping from Cape Hancock to this city and rive steamers on the waters of the Columbia and Snake rivers so that whe it grown at Colville or in the Big Bend or Yukima countries or on Snake river as far as Lewiston and per haps far enough above to transport the pronots of Eastern Oregon and Southern Idaho

-Portland will be Quee city of the North coast in a surer sense thu she can be with out such river transportation. It is not casy to over estimate the interest Portland has in bringing such tran portation to pass Let the river trade recompilsh here what is possible if the government will do what is right for our region and results will greatly favor producers and production will in turn build up a great future for Portland One fact that should be made plain to congress is that nowhere else in the United

States is there the same imperative need for improvement of rivers and harbors as exists here. No where else is there a great river so hampered by natural obstructions or agreat city, like Portland, that wais for the Improvement of its great harbor, or river en trance, and for the clearing of rivers to make them navigable. Nor is there any where within the national domain a nicflucing population so dependent on cheap transportation for success and permanent pro penty. All exceptions favor this region and entitle it to denind recognition to a greater degree than any other section can

In 1880 the vote of Oregon avas 40 816 The census taken that year showed that the population of the state was 174 168. The vote of the state this year is 61 91) Upon the same ratio of voters to population as in 1880 the population now would be about 263 000. But with it crease of families the ratio of population as compared with voters is stendiven creasing and we think the population of Oregon may now be about 0:000. In 1880 we had 421 inhabitants to one voter. The pro-portion may now we limk be nearly five to one. The vote of Wa hington territory is not vet officially reported but appears to be shout 45 000 or only 17 000 less than the vote At the rate of five persons to voter Urigon would I ive 300 505 inhibitant's and Washington ibout 245 000

The board earnessty desires the co-opera-tion of all of our citizens regardless of re-ligious belief or sectarian differences. It is a public and general enterprise intended for the benefit of the whole community, and will be conducted in a business like manner, it is honed, by business men.

Atthough we intend to do our best to see everybody who may be interested in this enterprise, and personally solicit their cooperation, it is inevitable but that some will be missed. Buch persons with, we hope, make themselves known to the committee of their own accord. Before the books are closed they will be deposited in some public place for a few days, of which ample notice will be given, so that everyone who will may join. The purposes and objects of the board have been sufficiently advertised, and we invite as members everyhody who has any interest in those purposes and objects, or who wishes to destroy professional begraty and systematize and render more effective the charities of the city.

All persons now signing will be known as

the positry dealers of the city yesterialy is evidence of the great increase in the population. Thickeys were hung in front of positry shops on racks erected for the purpose, and waron loads of them were dying around town all day long. So many tarkers were never seen in the city at one time before nor such fine-cones. The largest seen was hieled 37 30 and there were plenty at \$6. Those who had the most to be thankful for, of course, bought the largest turkies. The map who look in the \$7 30 bird must ful for, of course, bought the largest turkies. The man who cook in the \$5.80 bits must have had a heart overflowing with thankfulness and a packet overflowing with thankfulness and a packet overflowing coins and he will be tonful for uttenance to-day. It is to be supposed that Thanksg ving was spidemic among the turkeys of this state, and just where the supply for Christmas is to come from remains to be seen. It is safe to say, however, that there will be a supply equal to the demand.

Thankselving Oppreing.—The following note is self exchanatory: It has been the custom for a number of years past to canyuse the business portion of the city in the interest of the Good Samaritan hospital a day or so before Thankselvina. The ladies of the Relief Society also took up a collection for the benefit of the Orphaus Home. After a conference between the officers of the Relief Society and the managers of the Relief Foociety for the Home should be taken on Thanksgiving day, leaving thristmas time for the Good Samaritan hospital. This explanation is made that the friends of the institution may understand why the customary offering for the Good Samaritan hospital was not made this week.

HAS NOT GIVEN UP HER DEAD. The Pate of Young Curling Still Shrended in Mystery Search for the Bedy.

The fate of Thomas H. Curling, the missing sailor from the Embleton is still en-shrouded in mystery. It seems that during the last day he was on board his saip he came over to town and bought quite a numthe last day he was on board his ship he came over to town and bought quite a number of things, including clothing, etc., which he left on the ship. Before he went asbore that night he had changed his clothes, and wore only bis old working sea clothes. The crew scout the idea of his being Shanghaied, as the only vossel which cleared at the time was the Benjanni Swadi, and Capt. Ulmer would not be a party to any such action. Besides, Curling never took a drink of amything, and it is pretty hard to shanghai a sailor who does not drink. The only alternative from the conclusion that he is drowned would be of voluntary running away, which is not probable, it view of his leaving overything behind him.

Mr. Hugh Brady, who found the body of the sailor drowned from the Androsa, and recovered the body of Dr. McKennie's eterson from Tanner creek has winter, has been dragging the styre near the shore in the neighborhood of the Embleton, and while he succeeded in bringing up a pair of scales which were look some two months age, no iruce of the body was found. In the opinion of some the body would have been caught if the boy was drowned.

THE BAR WHAL HOT BE SLUICED.

THE BAR WILL NOT HE SLUICED. Elder Will Not Be Used.

The arrangements which had been made

The arrangements which had been made by Maj. Jones, United States engineers, with Mr. Cookingham of the O. R. & N. Co., for the employment of the Geo. W. Elder in slutcing at St. Helen's bar, were annulled yesterday.

The river pilots represented to Maj. Jones that there are a number of vessels in port which are loading deeply in the expectation of availing themselves of the high tides mext week. If the work of dredging were begun the channel would be blocked till it was flushed, which would occup several days, and the ships here would lose the benefit of the high tides, and other ships would be delived in getting here. These reasons seem plausible, but it would have been much better if the bar at St. Helons could have been sluteed out, for there is a probability of the water being lower before Christmas. The disk at St. Helens has not yet caused the clearing away of the obstruction there, but perhase may effect its object during the next rice of the Columbia.

Let us take care of the mained who risk their lives in shops to provide us the commodities of civilization, while at the same time we build up our manufacturing interests so necessary to the development of a new country.

As to the second statement that the East should help us in building and maintaining such institutions that I firmly believe Young men and women are coming here from the bast in case of their sickness or misfortner, it is our duty to care for them, this we can best do in our hospitals, but, in that case we have a right to ask the bast to help us to the extent fof their beneficent spirit and their financial ability. We care for their loved ones.

As to whether the sermon would make good hospital literature the proof of the pudding is in its eating. Though the morning was rainly and lair warning had been given through the pressiblation and her members were absent we rolled up a magnificent collection. I hope Quixote made his court button, even though the sermon was poor the one who preached it felt that more keep the sermon described and definition.

A Washington special (November 22) to the Pittsburg Dispatch says

The determination of the national committee of the republican party to contest the right of the electors in Virginia to cast their votes for president and vice president the assumption being that they were elected by fraud is but a beginning of a vigorous work which will doubtless expose once more the methods pursued at elections in many of the Southern state. The contest has been determined upon after careful deliberation and as a result of consultations between using of the leading minds of the party.

The republicans are determined to get at the very bottom of the rescality by which they believe the states of Virginia and West Virginia were brought into the fold of the democrate nearly two weeks after the elections were held and after many members of the democrate nearly two weeks after the elections were held and after many members of the democrate party had dimitted a 'clief that the republicans were victoric is it is now more than the weeks after the dection and no one can tell which jurty will have a majority of the certificates of dection to member-dip in the house. To Mise Waterary Association before giving it to the public dent B L bmith of our organization, for his information before giving it to the public ows this up with a statement about what

lows this up with a statement about what may happen if both parties push their claims to a majority in the next house. It says

Whatever work is being done by the democrats, if any is kept quiet, or else entirely in the hunds of the local managers in the doubtful districts. Some of the officers of the house point out the acknowledged defeat of Jonaston of North Carolina in a district that has been regarded as safely democratic and say that if they were thinking of staking the house they would certainly have begun there. They point this out as one cridence of good faith. They protest that hecance a district in the South may be in doubt that is no reason for the assumption at once that the republican is elected. On the other hand Mr. Quay's folks think that when a doubt is confessed to in that locality it is pretty good evidence that the domocrat has not been elected. But it is not upon this general assumption, they say that their claims are based. All their information from their friends on the spot is to he effect that the returns unlarified with will show on their like that republicans have been elected in this of the friends.

to he effect that the returns untarreved with will show on their face that republicans have been elected in those districts of Fennessee foundam North Carolina Kentucky and West Virginia that are claimed or set down as doubtful by the democrats As to lksy nors district in Muryland, it is not denied that the face of the returns show the election of Stockbridge republican. Mr Quay and Mr Duilley do not attempt to disguise the fact that they fear the democrats may attempt to organize the house and the republicans generally are quite loud in their expression of suspicion of tear as to the pur posas of their opponents.

The most serious aspect of the affair arises upon the possibility of the democrats showing up with a majority of two or three Phere is hardly room for a doubt that feeling as they do now the republicans will not permit the democrats to organize the next house without resistance. A serious situation might arise from both parties claiming the organization. But the chances are that this may be avoided by the democrate not making a desperate fight to keep control Many of them are disposed to regard it as to their advantage to be in the minority and are expectally opposed to any further resist ance to the admission of new states into the Union.

zontal disk which revolves rapidly while the cylinder remains at rest.

When a lever is operated by the keyboard—or in Frot Munson's machine by the automatic apparatus the lover type of the pile of letters corresponding to it is tuched out of its groove upon the swiftly revolving disk and is carried around to a point where it is pucked up by a soit of a grapper and plees in a narrow groove. As others follow the line of tisp grows and moves along to a galley upon which each line of the proper length to fit the column, take its place one after at ther.

The distribution of type by the Thorne the distibution of type by the Iboria muchine which is second in a partianc only it dide setting is accomplished submatically. The upper half of the tail upright cylinder revolves upon the lower half. A column of matter is fed line by his into the grooves of the upper half. Each type has its own particular noteh, or series of notcheson the sade, and while the grooves of the upper half of the cylinder are plain and will admit say character, those of the lower have little rid, as corresponding to life notches on the letter which they are intended to held. As the upper cylinder revolves each type falls into the grooves of the lower cylinder to which it belongs and it can fall into no other. It is the principle of the so called flat key or pin locks applied in a new way. With the app icution of his own machiner to the thorne in the latter. Prof. Manson is able to set comething over 5000 emis per hour. This is said to be about the speed of the Tortie machine operated by itself, but Munson's type, when set is corrected and justified. The professor is at work on a michine to complete his own apparatus as a whole, and believes that he can achieve much greater speed.

The unfortunate difference between (of Beebe and the officers of Battery A First artiller) O N G has arisen out of cruves which reflect credit rather than discredit upon the interested partie. The infantry and artillery are both in debt occusioned by the liberal and handsome main reain which their member-hip from Coi Buche down have taxed their if vate purses in fitting up and maintaining one of the most complete and elegant institutions of its kind in the United bittes.

Both departments thus feel poor and pealously guard every scenus of moome and experior The matter giving rise to the present trouble has been satisfactorily adpresent total and if the public has any wish to provet to similar one in the future the best way to do it is to bear the milital companies in mind and show a financial as preciation of their very excellent and public spirited

Mr. Dunne got pretty well warmed up towards the last, when after re-peated cautioning the contestants again dirffed nom settlement to recrimination. From appearances, all were satisfied with the arrangement, though regretting the con-cessions made under pressure by themselves. They manifested a purpose to hereafter live together in harmony.

Commissioner Dunne briefly stated the purpose of the meeting that he had been designated by Judge Callin to attempt a sat ary adjudication of the trouble

Col Beebs by request proceeded to set forth his position. He thought the battery and the position are trought was career, should bear an equitable proportion of the armory a maintenance, and coundered \$15 per month a fair figure, this to include use of the large room gas bull, lantor a services

Commissioner Dunne—Will you allow the battery the excitive use of the large hall for one night in the week?

Beebe—I have always wanted to do so, and dayst if it can be arranged. The provision that the battery should use the same night as Coropany I, and hegin at 9 o clock. I made under the full understanding that it was satisfactory to the battery as their membership being older and in business. I supposed could not well get together much earlier. The difficulty now of course is that the promeanade concerts are on and we need the \$15 or \$20 weekly which they are the

the \$15 or \$20 weekly which they are the means of raising

Here the first of several displays of ama teur legal practice occurred. Dr. Miller, by a series of cross-questions, endeavored to have Col. Beebe figure out that he had been guilty of misstatement which the colonel with cheerful adroitiness proceeded not to do Other such encounters resulted similarly. Lieut Summers essayed by cross questioning to involve Dr. Miller in an inconsistency concerning his communications between the battery and the cotonet. The doctor was no more willing to ascrifice himself than Col. Beebe had before him. The legal practice was confined to these two-gentlemen. Mr. Dunne proved something of a boomerang in the hands of the doctor on the subject of making a dance hall out at the airmory. The commissioner took occasion to say that he had once belonged to the Erst regiment of San Francisco and knew a thing or two himself about the appropriate advantages accruing to an embar raised regimental treasury from dances and concerts.

A decided hit was scored by the battery in the matter of the regiment's gas bills. To Mr. Dunne's inquiry as to their amounts the colonel said. They vary, sometimes they are as low as \$30. Sometimes as high n. \$50. Dr. Miller rose to the emergency, having proviously fornied himself with the eract amounts which he proceeded to read They were. April \$42.05 May, \$46.25 June \$25.80, July \$27.05 August \$13.25 keptember \$24.85. October \$44.25.

The britery's are has been fully stated heretofore Capt Riley and Dr. Miller manitained that their presence in the building increases in no degree the expenses of the armory. They consider that \$7.80 is more than enough to cover all their gas builded that their manifestation would agree to keep the large half claim would agree to keep the large half claim from their drills. The colonel rain forced by the other members of the regiment insisted that \$10 was very reasonable.

The prisoner was turned over to United States Marshal Myers and sent to the county juil to await his trial which has been set for December 14. Marshal Blerbower stated his reason for not turning Janeway over to Deputy Riberts who went after him, was that the United States district judge had in structed him. to bring Janeway here, and he had obeyed orders. If Mr. Roberts had remained in Omaha he would have been omployed as a guard and his iee. would have paid his expenses.

AMUSEMENTS

NEW PARK TREATER -- Another isroe and: NEW PARK THEATER—Another large auditence greeted the reappearance of the Chip of the Old Block? Company at the New Park theater last night. The play was greeted with repeated roars of larghter. From rise to fall of the curtain the andance was kept in a capital humor. This evening the play will be repeated. This afternoon there will be a grand Thanksgiving matinee for the special benefit of ladies and little folks.

Shameless Fraud to Virginia

Shameless Fraud in Virginia

Chicago Iribana.
The vote of Virginia is offi fall, returned as follows. Cleretand 151 J77. Harrsson 1:0:442, Cleretand 154 J77. Harrsson 1:0:442, Cleretand 154 J77. Harrsson 1:0:442, Cleretand 154 sapparent plurality. Its is the plurality in it appears on the face of the aftered returns. It is a matter of common notoriety that by the changing of votes the republicans were robbed of nearly 6000 votes and that the state was carried by them by about 4000 plurality. The most of this robbery was perpetrated in the second and fourth congressional districts, which two years ago went republican by an aggregate of 14,000 majority. Thirty counties in Southwest Virginia show ed a republican gain of 8000 and Blaine was only besten 6141 four years ago. The fraud was an open and shameless one but it will not be allowed to stand without a contest. It will be taken into the courts under the laws of the state which provide ample relief in case of fraudulent counting, and the whole disgraceful business will be ripped up from top to bottom. It will not be allowed to stand without a fight.
